Per our conversation, we will be removing logic from EDBC that
populates the
reason code 242 for MA L and MA J AGs. Once the program change goes to
production, MA L
or MA J will not pend for the reason code 242.

Also we need to remove similar logic from AEOAG program so that it does
not prevent the
caseworker to FIAT MA L or MA J AG for the reason that the individual
is a waiver
recipient.

As I said we are going comment out these logics so that it will be easy
to put it back if
you change your mind.
```
